

Reference No.: 6.28

Vacuum-tumble dryer

The tumble dryer facilitates impregnation, mixing and drying of activated carbon. As a result of off-centre suspension the drum executes a tumbling movement that contributes to a careful and homogeneous mixing of the filling material.

Technical data:

Heating capacity heating segments:	15 kW
Drum volumes:	500 l
Vacuum:	<150 mbar
Temperature-heating segments:	approx. 250°C
